RESTRICTION/ELECTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-22, 27-34, 40-47, drawn to biometric identification system, classified in class 382, subclass 115.
 - II. Claims 23-26, 35-39, drawn to generating 3D image database, classified in class 382, subclass 154, and class 345, subclass 419.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as biometric identification. Invention II has separate utility such as 3D image generating. See MPEP 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the **cancellation of claims to a non-elected invention**, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by

a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
